### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 03 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anstadt et al., USP 4,141,944.

The cited reference substantially teaches the basic claimed process of molding a foam material into a desired form (col. 2, lines 25-30) such that the surface of the form has minute cavities formed therein, providing a heated embossing tool (col. 6, lines 55-60), and embossing a desired pattern in the surface of the foamed material. As the heated device enters the surface of the foamed material, the foamed material is melted and cavities or furrows are formed. These cavities or furrows form a relief pattern of desired design. See col. 6, lines 45-68; col. 7, lines 1-15.

Art Unit: 1732

The cited reference does not teach a sponge per se.

Note that sponges are made of foamed materials, and readable on any foamed material disclosed. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make a sponge using the method steps set forth in the applied reference, as consideration of the reference is not limited to its preferred embodiment, but extends to the molding of any conventional product including sponges.

With respect to claim 2, the pattern formed is well within the choice of the practitioner; note that the reference does set forth embossing in select pores to form a desired pattern, see col. 2, lines 59-68.

With respect to claims 3-5, the shape of the embossing tool is not shown in the applied reference; however, such is conventional in the art, and within the choice of the practitioner.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USP's 2190376; 2590983; 3390403; 3904557; 4304747; 5066531; 5993708 (heated tool and foam article); Jap. Ref. 6-238597.
